3. RISK MANAGEMENT STRATEGIES AND FUNCTION

Bank Management bears the responsibility of fully understanding the nature and extent of risks undertaken by the Bank and ensuring that these risks are appropriately aligned with the Bank's capital adequacy. The Bank acknowledges that a risk-taking approach is only justifiable when the risks are comprehensible, quantifiable, controllable, and remain within the Bank's risk capacity.

In harmony with the Directives and Guideline Papers issued by Nepal Rastra Bank, along with its own Risk Management Policy, Prabhu Bank is progressing towards the establishment of a comprehensive framework designed to identify, assess, measure, monitor, and manage all forms of risk. The current risk management structure within the Bank is as follows:

The Bank's Risk Management Committee, comprising two non-executive Directors, Chief Operating Officer, and Chief Risk Officer, is responsible for reviewing and analyzing all types of risks, including credit, operational, market, information security, and environmental & social risks. The committee regularly examines trends, assesses the impact of exposures on capital, and provides prudent recommendations to the Board. These recommendations guide the Management in proactively implementing required action plans.

To ensure a robust credit risk management system, the Bank has divided credit risk responsibilities into three distinct functions: credit relationship management, credit risk assessment, and credit administration. Each function has clearly defined roles and responsibilities. Alongside trend analysis and exposure impact assessments, the Credit Risk Management

Credit Risk Department ensures adherence to credit policies, procedural manuals, and other activities aimed at cultivating a risk management culture throughout the Bank.

The Bank strives to minimize the frequency and impact of unexpected operational losses by implementing well-defined operational manuals and guidelines, training staff for smooth service delivery, maintaining checks and balances on authority delegation, conducting comprehensive internal audits, following up on audit remarks, and having a business continuity plan for potential external disruptions. The Operational Risk Department remains vigilant in monitoring operational activities across the Bank. It also compiles reports on operational incidents within the Bank and gathers relevant external information, submitting these reports to the Risk Management Committee and the Operational Risk Management Committee, along with recommendations for necessary actions, which are then advised to Management for execution.

Market & Liquidity Risk Management Department, independent from the Treasury Dealer and Treasury Back Office, oversees daily treasury activities, monitors trends in liquidity, interest rates, and foreign currency exchange rates, and assesses the impact of these exposures. A robust system for monitoring and reporting risk exposures and evaluating how the Bank's changing risk profile influences capital needs has been established. Additionally, liquid assets are maintained relative to cash flows to ensure available funding sources even during crises. This includes a careful preparation and reporting of the structural liquidity position, gap analysis, and stress testing in regular intervals, all of which are presented and analyzed in the ALCO (Asset Liability Management Committee) for informed decision-making and future strategy formulation.

Moreover, the Bank has established a fully-fledged Compliance Department, led by the Head of Compliance, to ensure adherence to regulatory requirements and internal policies. The audit function operates independently, with the Internal Audit Department responsible for developing internal procedures, checks, and control systems, reporting directly to the Board-level Audit Committee.
